JMRCA NATIONAL CHAMPION Hiroshi Suzuki Top 4 finishers used the MR-4BC !! 2nd Yuichi Ajishi 3rd Shinnosuke Adachi 4th Akira Suzuki

EFRA EUROPEAN CHAMPION !!

off-road drivers in Europe. Congratulations !!!

Introducing the MR-4BC, designed to continue Yokomo's world championship-winning legacy in 4WD off-road racing. The MR-4BC SPECIAL 2003 is fully equipped, featuring titanium turnbuckles, high-strength lightweight graphite parts, blue anodized aluminum parts, and much more. A race-proven 2-belt 4WD system allows the MR-4BC to handle almost any type of surface. This championship contender comes equipped to deliver the type of performance demanded by off-road lovalists. An affordably priced entry-level standard kit is also available.

A real racer on a smaller scale.

MR-4TC MINI

Team Yokomo's Neil Cragg drove his Yokomo MR-4BC

to victory at the EFRA European championships held in

Vienna, Austria (8/5-10, 2003), beating out the best

The concept for the MB4TC Mini was simple. Create a 4WD touring car class that is cost effective, competitive and a ton of fun. Yokomo's Masami Hirosaka took his twin passions for 1/12 scale and touring cars and put them together. Our new MR4TC Mini is a real racer on a smaller scale with a 3mm race-weave, carbon chassis, four wheel drive and full independent suspension. Front and rear ball differentials and universals, efficient 2-belt drive and coil-over oil shocks are part of the deal. We finished the Mini off with a four cell design, standard sized 24mm Aero Dish rims and tires and a 1/12 mini Stratus polycarbonate body. Hang on for some highpowered excitement indoors or out....the Yokomo Mini is here! ■ 2-belt 4WD drivetrain ■ double wishbone suspension ■ ball differentials ■ woven carbon graphite chassis

■ oil-filled shocks ■ universal driveshafts ■ aluminum motor mount ■ foam bumper ■ ball bearings ■ spur gear 78T ■ pinion gear 22T ■ Stratus Mini body ■ aero dish wheels and slick tires

2002 IFMAR WORLD CHAMPION

YRX-12WE The definitive 1:12 scale race car, our YRX-12WE is designed around a SSG chassis with adjustable

battery positioning, adjustable double wishbone front suspension and a symmetrical T-bar with both coil over oil shock and friction dampening. The SSG rear chassis brace also allows for dual side dampers. Designed for world class performance on indoor carpet tracks, the YRX-12WE kit also includes wheels and foam donuts and is topped off with a custom MS-1 clear body that is so low and swoopy we had to mold in a hump to clear the damper post screw. For indoor and outdoor racing action and 4-cell performance the YRX-12WE is the one to beat.

HIGH PERFORMANCE R/C DRIFTING

NEW DRIFT PACKAGE SERIES

From the land that invented drifting comes the first 1:10 RC kit to capture the style, passion and excitement of the bottest new motorsport rage. Our new Yokomo Drift Package series captures the look and performance of full-size drift racers in perfect detail. With aggressive body cladding plus extras like aero mirrors, windshield wipers, wings, exhaust pipes, working lights and more. Look under the hood and you'll find the newest CM version of our race-proven MR-4TC SD chassis. Light and yet very strong, the molded CM chassis is easy to build and boasts shaft-driven full time 4WD, fully adjustable double wishbone suspension, LSD ball differentials and adjustable coil-over shocks. Last, but not least, are a set of unique Super Drift tires with special drift rings to produce mind boggling drift action. What's more, you can convert the CM to competition specs by simply mounting racing wheels and tires. Get in on all the drifting action with the world leader in RC quality, performance, and innovation.

YOKOMO GT-4 SERIES

The original 60+ miles per hour GT-4 RTR that revolutionized the ready-to-run nitro class

GT-4 RTR

This is it, the original 60+ miles per hour GT-4 RTR that revolutionized the readyto-run nitro class. The same chassis and suspension design that won two ROAR National Titles, in addition to Canadian, British and South African Nationals. Factory assembled in Japan, factory tested by Yokomo USA and powered by an outlaw .18 pull start engine. Available with a choice of either a Porsche GT2 or VeilSide RX-7, our GT-4RTR now comes with our new Yokomo 2 channel dual rate 27MHz system installed and offers all the adjustability of a pro racer. Pivot ball suspension lets you tune your GT-4 RTR's camber. The 2 speed automatic is adjustable as well. You can even change the shock oil to vary dampening on different surfaces. Why settle for anything less than the best for your first nitro RC car? The GT-4RTR can also be retro-fitted to race with ROAR-legal .12-size engines and can be upgraded with Yokomo option parts.

The new GT-4 RTR II takes the Yokomo line of ready-to-race supercars to the next level.

GT-4 RTR II

Everyone loved the GT-4 RTR, with its competition pedigree and in your face performance. The new GT-4RTRII takes the Yokomo line of Ready to Race supercars to the next level. The RTRII picks up where the RTR left off by adding our totally new .18 Yokomo rear exhaust engine breathing through an all new alloy tuned pipe. To handle the extra power of the new mill, there are mounted and glued Y-pattern radials on all four corners. To get you running even faster, we' ve factory pre-painted your choice of an officially licensed Porsche GT2 or HS-GT body. Finishing off the GT-4RTRII package is our new Yokomo two channel 27MHz system with dual rate steering control. Just add batteries, fuel and glow plug igniter, pull the starter and you are good to go with the only nitro-powered RTR touring car to win two ROAR National Championships.

Additional items required: r/c car engine fuel, glow igniter, tire glue, polycarbonate paint, AA size alkaline batteries x 12.

PART NO.	DESCRIPTION	PRICE
GT4RTR21	GT-4RTR II with HS GT Body	\$680.00
GT4RTR22	GT-4RTR II with PORSCHE 911 GT2 Body	\$680.00
Additional items re	equired: r/c car engine fuel, glow igniter, AA size alkaline batteries x 12.	

The newest version of our 2-time ROAR National Champion.

GT-4W2 LIMITED

The newest version of our 2-time ROAR National Champion, the GT4-W Verson 2 is our best nitro touring car yet. Features all the good stuff, including low cg engine mounts and machined 7075 duralumin chassis, Centax-type clutch, shoe-type 2-speed, plus aluminum shock towers, aluminum radio plate supports and posts, aluminum brake support brace and side belt tensioner. The GT-4W Version 2 also includes our super smooth, precision machined pro shocks, mounted, glued and trued foam racing slicks, front universals and a high impact, lightweight urerthane bumper. SG-type engine required.

Tire Temperature & Traction Relationship (Not using tire warmers.)

M Compound

Our best winter racing compound. Even at track temperatures of only 32 degrees, this revolutionary compound provides maximum traction without the use of tire warmers. Light weight rubber helps improve runtime. Due to the fast wearing nature of the compound, use with stock motors recommended.

B Compound

A long wear winter racing compound. Improvements in wear normally result in reduced grip, but this compound has very well balanced wear and grip characteristics. Highly recommended for those who prefer the feel of M compound tires. A unique characteristic of this compound is that even when overheated, the tires are unlikely to cause the car to spin out. In most cases, a tire warmer is not necessary, but if the tires lack grip in the beginning, but gain grip while running, tire warmers are recommended. In all other cases, using a tire warmer may actually cause the tire to overheat, and is not recommended.

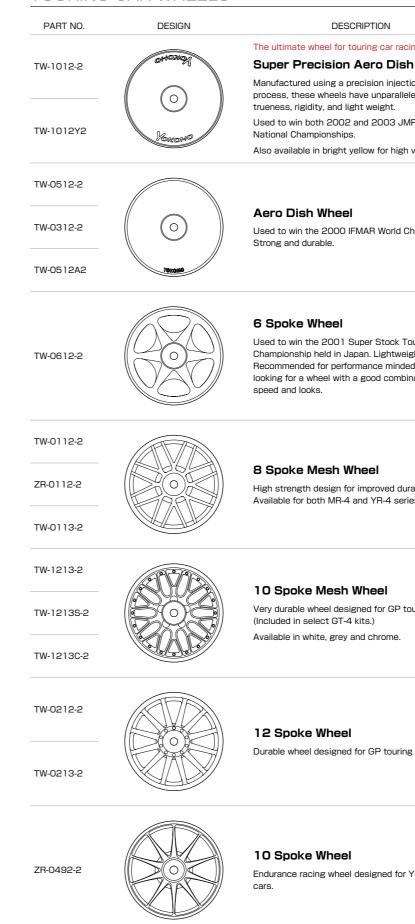

GS/G Compound

Works very well with EP touring cars on most track surfaces. Both GS and G compounds are based on the same compound. G is standard, and GS is a more high grip, fast wearing compound.

GF/GH Compound

Works very well with GP touring cars. Both GF and GH compounds are based on the same compound.

TOURING CAR WHEELS

PART NO.	DESCRIPTION
	Unleash the full potential of your tires with the ultimate tire warmer !!
	PRO Tire Warmer
	Undoubtedly the ultimate touring car tire warmer, jointly developed by Team Yokomo and Team Sorex.
	O Input power source: DC12V or 7.2V battery (that can be installed inside
YT-PTW	the unit) O Set target temperatures individually for the front and rear,

YT-PTW

TN-1

Tire Sander

Designed to work with 1/10th scale touring car rubber tires. Using a piece of sanding paper, thin lips or projections that occur at the tire's mold \$90.75 parting line can be removed. This unit can also be used to refresh the tread surface of tires that have already been run. DC12V power supply required. Sanding paper sold separately.

between 5.0 \sim 80.0 $\,^\circ\!\mathrm{C}$ (45 $\,^\circ\!\mathrm{C}$ maximum when using a battery). Unit will

automatically maintain tires at their set target temperature. \bigcirc Back lit LCD screen accurately displays temperature readings from all four tires in real

time. O Heats quickly (requires only 5 minutes to warm tires from 25°C to 80 °C). O Convenient built-in timer feature. O Metal warming Cup are an

exact fit for Yokomo and Sorex tires. O Durable construction.

Make the right tire choice by accurately measuring track temperature ${\tt !!}$

TN-1 Infrared Temperature Gauge

A compact temperature gauge that accurately measures the surface temperature of objects without having to touch them. Use to measure track temperature, engine/motor temperature, battery temperature. Can \$65.00 also be used as a kitchen tool to measure frying oil temperature, frying pan temperature, etc.

 \odot measuring range: -33 \sim +220 $\,$ °C \odot measuring variance: ± 2 $\,$ °C \odot reflectance: 0.95 (adjustable) \bigcirc battery: CR2032 (included) \bigcirc size: 18 \times $\rm 37 \times 68 mm$ \odot weight: 32g (including battery) \odot storage case, strap, and extra battery included.

PEAK MATCHED Z3300HVR SG2 6-Cell Unassembled Pack

Z3300HVR G3 6-Cell Unassembled Pack

High performance matched packs. All packs feature discharge times of 400+ seconds, and average discharge voltage of 1.170V and up. Battery bars also included.

Runtime-oriented high performance matched packs featuring 420+ second discharge

times and 1.163V and higher average discharge voltage. Battery bars also included.

High grade unmatched zapped cells. These are cells that were extracted out of the process because not enough matching cells were found. Battery bars also included.

with Yokomo original battery cells.

High performance racing batteries have always been an integral part of Electric RC car racing. Recent years have witnessed tremendous gains in battery performance, especially the Z3300HVR cell, which has evolved into one of the best performing cells in regards to both power(voltage) and run-time(capacity). The newest TYPE-B version of the Z3300HVB cell features even better performance, with an unparalleled combination of power and run-time. Even under the restrictions set forth by the race-sanctioning bodies, the SUB-C type battery has seen an enormous leap in performance. And just as one begins to wonder if further improvements are even possible, new batteries with enhanced characteristics are released. Such is the new R3600HVC cell, with incredibly longer run times. Like the Z3300HVR cells these have been ZAP 2 processed for maximum performance.

Whether your battery requirements are high voltage for stock motor racing, or long run-time for 4-cell modified racing, we have the batteries to help you take your racing to the next level.

CS-NC	Nano Carbon RC Contact Enhancer Improves conductivity of motor and battery connectors.	\$22.50
CS-FO	F-ZERO Oil Spray Lubricant Spray lubricant for bearings.	\$32.50

SHOCK OILS

PART NO.	DESCRIPTION	PRICE					
Shock oil is used in the shocks to help dissipate energy stored by the spring, and to keep the suspension from bouncing out of control. The number in parentheses indicates viscosity. A higher number indicates thicker oil.

GT-4 RTR II

ABOUT YOKOMO

HOW IT ALL BEGAN

Yokomo originated as a radio control hobby store. the Yokobori Model Shop in Tokyo, Japan. Yokomo was derived from "Yoko" as in Yokobori (the family name) and "mo" as in Mokei, which is Japanese for models.

In 1965 Yokomo created what was very likely the first true radio controlled RTR, a converted .049 powered Cox Dune Buggy with one servo and a 3 channel Futaba system. Our RTR Buggy instantly became popular and introduced RC cars to Japan.

In 1970 we introduced the 1:8th scale Associated RC-1 to Japanese RC enthusiasts. Soon we began making option parts for the Associated cars, and to this day we continue to promote and support the Associated line of RC cars in Japan.

One thing is certain. Today the Yokomo name can be found on Championship trophies all over the world.

From humble origins a racing dynasty emerged, with cars bearing the Yokomo name winning 10 IFMAR World Championships, and countless National Championships.

BACERS FROM THE START

1977 was the year Yokomo introduced our first competition kit, the Mini Racer RC12. If you happen have one, it is a genuine collectors item, since the car was never imported into the States. More importantly, the Mini Racer confirmed our intent to become a race car constructor. From that time, Yokomo kits would be designed with competition performance paramount.

MINI RACER RC-12 WITH 917-30KL BODY

Next came the YZ-834B in 1983. This 1:10 scale. 4WD Off Road missile was driven by Gil Losi Jr. to victory in the very first IFMAR Off Road Modified Class World Championships in 1987.

The success of this original Dogfighter confirmed our belief that the pursuit of excellence, use of only the finest, leading edge materials and traditional craftsmanship would be the trademark of all that

THE DOGFIGHTER

carry the Yokomo name.

Our engineering team really got their chance to shine up those trophies when our first Dogfighters tore up the racing circuit.

The YZ-834B and legendary YZ10 introduced a generation of RC racers to the incredible speed and performance of 4WD, electric off road buggies. From the time these first Yokomo cars hit the track, RC competition changed forever. And we are still teaching the old Dog new tricks, our newest MR-4BCS is a European and Japanese National Champion and will be gunning for our 11th World Championship overall, an unprecedented 7th in its class.

YOKOMO USA - WHERE IT ALL COMES TOGETHER

Yokomo USA in California is the newest member of the family. which has expanded from our first hobby shop to include manufacturing of championship-winning RC car kits and race-bred RTRs, Yatabe Arena and Japanese distribution for Associated and other imported fine RC products.

With a line of products that now includes our new MR-4TC SD 1:10 electric touring car, MR-4TC MINI 1:12 electric touring car, the MR-4BCS 1:10 4WD offroad buggy and the GT-4 series of 1:10 nitro touring cars. Yokomo USA is committed to providing the same high level of quality to customer service and technical support that you demand.

Go to the track with Yokomo and you will see that we make model cars for real racers.

ADDITIONAL INFORMATION

WHERE TO BUY

If you want to know more about a specific Yokomo product, or the location of the Yokomo dealer nearest you, visit our website at www.vokomousa.com or call 1-949-252-8663.

You can also contact the following RC hobby distributors for the location of a Yokomo dealer near you.

Horizon Hobby	1-877-504-0233
Great Planes	1-800-637-7660
ERI Associates	1-845-268-5090
GHI Distribution	1-714-921-0322
Global Hobby Distributors	1-714-964-0827
RCS	1-408-943-0874

NEW PRODUCTS

Keep up to date on the latest Yokomo news and products by visiting our website at www.yokomousa.com.

TECHNICAL SUPPORT

When you buy a Yokomo product, you also get specialized service and support, because we understand that in order to get to the winners circle, sometimes it takes more than just a fast car and top-notch equipment. Count on our knowledgeable staff to keep you up to date with the latest tech advice from our championship winning team drivers and experts. Call or email us with your questions, we've got the answers.

HOW TO ORDER

You can order by phone, or online via our web site, but kits must be ordered through your local hobby dealer. You cannot order car kits from Yokomo (with the exception of discontinued kits). Unless listed as a specially priced item, prices are set at full retail. Your local hobby shop may actually have lower prices. We encourage you to support your local hobby shop.

CATALOG UPDATES

Product prices, descriptions and specifications listed in this catalog are subject to change without notice.

DEALER RESOURCES

Looking for a distributor in the USA? Please see the above listing. Want to have your hobby shop listed on our online Dealer Locator list? Email sales@vokomousa.com or call 1-949-252-8663.

WANT TO BE A DISTRIBUTOR?

If you want to be a Distributor for Yokomo USA, email sales@yokomousa.com or call us at 1-949-252-8663 and speak with our Sales department.
