Birki®

quality shoes made in Germany

Kids  
2008

[www.birki-kids.com](http://www.birki-kids.com)

**Alina**, 4 years old, loves to slide and to tests her balance on the exciting Pedalo<sup>®</sup>. And Kimberly is always nearby to ensure her safety.

**Felix**, 5 years old, is a real climbing artist – no matter whether on the wall bars or on the monkey bars – nothing is too high or too steep for him, as long as he can still jump down without hurting himself.

**Paula**, 4 years old, likes to race her friend Felix on the swings – who is going to fly highest? But she almost prefers playing shop with Samuel – shopping is her favourite activity.

**Samuel**, 4 years old, likes it really fast! Whether on his scooter or his ride-on car, he usually is a lot faster than his friend Felix. Sometimes he also climbs the jungle gym at the playground with him.

# our kids

**Thao Nguyen**, 8 years old, could skip rope or play hop scotch for hours on end – just like her friends. This is not only a lot of fun, it is also very exciting. Who's going to win?

**Diana**, 7 years old, really likes her bounce ball. She can bounce quite far on it. And if she's tired of that, she rocks on one of the funny-coloured rocking animals or plays with her friends.

**Kimberly**, 12 years old, is never far away when some French skipping is underway. She knows a lot of different games and sometimes even invents her own. Meanwhile she casually helps the smaller ones on the Pedalo®.

**Meilo**, 2 years old, likes it best if one romps with him through forest and meadows. Or throws little sticks. Or simply holds him permanently on the run. The best: he is always absolutely dear and loyal to you.

*Ernsting's*  
**family**

**Special thanks to:**  
Ernsting's family GmbH & Co. KG  
[www.ernstings-family.de](http://www.ernstings-family.de)  
for being so kind to furnish us with kids' clothes for the photo shootings.

## Cork Sandals and Clogs

---

Naturally comfortable! With anatomically moulded, durable cork footbeds. For curious adventurers and little princesses! Page 6 – 37

## ALPRO<sup>®</sup>-foam/ALPRO<sup>®</sup>-cell Clogs

---

Simply versatile! Made of robust ALPRO<sup>®</sup>-foam or ultra light ALPRO<sup>®</sup>-cell. For “Super” games and a lot of “Fun”! Page 38 – 45

## ALPRO<sup>®</sup>-foam Sandals

---

Particularly flexible! Sandals made of ALPRO<sup>®</sup>-foam and Birko-Flor are indestructible and easy-maintenance. Ready for all sorts of adventures! Page 46 – 59

## Birki Kids Accessories

---

Perfectly equipped! Hooded jackets, backpacks, long-sleeved T-shirt our unmistakable Birki Kids design! Page 60 – 61

## Non Leather

---

This symbol shows you all shoes that are completely made without leather. In the cork segment we use Birko-Flor as upper material and a microfibre material (Birko-Lon) is used as footbed liner.

# Your feet's very own bed

Your feet are truly brilliant little “power plants”. They join in all the fun you have no matter whether you’re climbing the jungle-gym at the playground, sliding and swinging, playing hide and seek in the woods or having a race with your ride-on cars or scooters.

Your feet still grow – something you don’t really notice – but when they do, they need your support. And ours!

How do we do that? Quite simple. Just imagine your running around at the beach. That’s great, isn’t it? Every step you take leaves a footprint in the sand. That’s exactly the way our footbeds are made, as if you had placed your feet inside and mirrored their shape. The footbeds let you stand really well – and they let you have even more fun when playing and horsing around.

Here are just a few explanations of the functions of your footbeds:

The **toe grip** has a funny shape. But this is quite important. When you walk it seems as if you’re picking something up with your toes. This may sound difficult – but with the help of the toe grip it’s really easy. And you get great leg muscles to boot.

The **longitudinal arch support** – we know that this is quite a difficult expression – doesn’t rigidly fix your feet inside the footbed, but it holds them firmly inside. This way you feel less pressure when you walk, stand and run.

The **heel area** is **extra deep** so that you can stand in it really well. You don’t twist your ankle, you walk comfortably and your footbed adjusts perfectly to the heel at the back of your foot.

We have made your **footbed** out of materials which work like a shock absorber: cork and ALPRO®-cell or ALPRO®-foam. No matter how long you play and horse around, the footbed cushions every single one of your steps. And you can run around as long as you like.

In order to protect your feet all around we have designed the **footbed rim to come up extra high**. This way you don’t slip out of the footbed at the front or back if you don’t want to and, of course, it prevents you from easily hitting your toes as well.

Footbed with cork centre

Footbed made of ALPRO®-foam

## Quality "made in Germany"

Do you know what Quality "made in Germany" means?  
 Probably not, but it's easily explained.

No matter how much you run around, jump, play and frolic in your Birki's sandals or clogs, they simply have to last long. That's why we make your shoes only in Germany. That's the only reason we – and you, too – can be sure that the sandals and clogs are always good and you can enjoy them for a long time. And we can check and double-check them when we make them and make them ever better, more colourful and more comfortable.

## The cork footbed – especially made for your feet

Just imagine you get a pair of sandals or clogs with a cork footbed made by Birki's. You slip inside and just feel like running around and playing right away. Because it feels as if you've never worn anything else before.

This is due to the special design of the footbed. And, of course, due to its shape. It's made as if we had taken a mirror-image of your very own foot. The footbed is made of really great material such as soft suede leather to line it on the top, absorbent jute in the middle and an indestructible mixture of cork and EVA at its centre so that the footbed remains flexible. This way you have firm hold inside the footbed when playing – with or without heel strap.

## Soft Birko-Flor – so that your shoes look really good

Of course you like to play and frolic around like all kids. You jump, run, race your ride-on cars and push off the ground with all the power you've got. Your shoes must stand up to all that hard work. That's why we use Birko-Flor as upper material. This is a soft man-made fleece which doesn't chafe your soft skin or pinch or rub: it quite simply gently touches your feet.

The top is coated with a fleece which makes it undestructible. You hardly notice any scratches, the patterns stay colourful, the material doesn't rip or tear and when your shoes get dirty, you can simply wipe the dirt off.

## Super-Birkis

Would you like to quickly put your shoes on and off when you go outside and come back in? Quickly slip into one of our Super-Birkis. In lavender, red, green, yellow, apple green or blue. They join in all the fun you have! No matter whether you are playing, swinging, running through wet grass: your feet stay completely dry. This is due to the durable material ALPRO<sup>®</sup>-foam. The clogs can be used for almost every activity: the foam is flexible when you play and horse around, durable, when walking on hard surfaces, water and dirt repellent, when you play outdoors. And the clogs are really comfy because they have a replaceable cork footbed. It lets you play on and on without getting you tired too fast. And if your clogs are really dirty once in a while, you parents can simply wash them at 60°C, the footbeds themselves at 30°C.

## Fun-Birki

Wouldn't you just like to have shoes that are so light you hardly notice them on your feet?

Then you should try our Fun-Birkis. They simply look great!

The clogs are made of featherlight ALPRO<sup>®</sup>-cell – including a contoured footbed. This way the clog perfectly moulds to your feet so that you stand a lot better. But the best is that you don't slip and slide around – neither inside the clog itself nor on the ground.

Your Fun-Birkis really join in all the fun. They are especially light and last long. And they are very easy to clean.

The Fun-Birki is now also available with ventilation openings (Air) and heel strap (BS) so that you have an even better hold. The heel strap can be adjusted. You just open and close it with a snap so that you can slip in and out without a problem.

## Just for you: great sandals made of ALPRO<sup>®</sup>-foam

You have probably noticed that we have a lot of different sandals in our programme: with footbeds made of cork or ALPRO<sup>®</sup>-foam.

Even our ALPRO<sup>®</sup>-foam sandals have footbeds which are anatomically moulded to the shape of your feet just like their “buddies” made of cork. In order to prevent you from slipping around inside the sandals the footbed has a special pattern with little grooves in it.

The sandals get wider and wider on their way to the ground and underneath them they have a great tread which looks like a little foot and helps you to stand safe and sound.

The footbed is moulded right to the upper material which means that the two cannot come apart at all – ready for all your adventures.

And your shoes are made without glue – that's great for your health and the environment. Without glue they are better and last even longer!

## Comfort you can feel – only the best material

### Truly versatile: Birko-Flor

---

As an alternative to leather we use Birko-Flor for many of our styles. With Birko-Flor you get a very durable, virtually indestructible material. On the inside it is especially soft and on the outside it features a special coating. Birko-Flor is tear-resistant and absolutely easy to clean.

### Simply comfortable: Cork

---

Pure, high quality cork used for our anatomically moulded footbeds features excellent shock absorbing properties when walking while supporting your natural step formation. In combination with the best natural materials rubber, jute, and suede leather you will experience a particularly comfortable walking and standing sensation.

### Particularly flexible: ALPRO<sup>®</sup>-foam

---

This durable and ultra flexible material is used whenever non-abrasive, durable, non-slip, water and soil resistant sandals and clogs are required – at the swimming pool, sauna, spa, garden and outdoors. The special feature of ALPRO<sup>®</sup>-foam: You can wash it at up to 60°C.

### Hardly noticeable: ALPRO<sup>®</sup>-cell

---

This material is truly light as a feather. Due to its hardly noticeable weight you find ALPRO<sup>®</sup>-cell whenever fun and action are hip but durability and comfort are a must: when surfing, sailing, canoeing or simply at the beach, just to give you a few ideas where it can be used.

### Securely attached: Birki's buckles

---

Birki's buckles offer secure hold. Our adjustable buckles are the best companions not only outdoors but also at the pool, sauna, spa. The reason is a powder coating finish which renders them rust-proof. Two to four staples securely fix the buckles to the upper material.

# Birki's explains Birki's

## You determine how to go on! – with Birki's functional styles

You probably know this scenario: You need firm hold while walking or playing with your children. An instant later you simply want to relax and slip in and out of your shoes easily. Just as your kids.

Functionality is not only important for those who are making preparations for a special hike, trekking tour or active holiday. Functionality is way more than that: for us it means as much as adaptability. With our functional elements you can adapt your shoes really easily to a variety of demands. You determine when to wear your shoes – and we offer you options how to do it.

Simply adjust Birkis and leave nothing to be desired!

Birki Fun-Air BS Kids – ultra-light, with removable heel strap

Shetland Kids – supple Birko-Flor, with flip-over heel strap

Tofino Kids – one sandal, three styles

Sumatra Kids – cute, lightweight thong sandal with removable heel strap and different snap-on accessories
