Weatherstrip Sets

Replace worn out, cracked, deteriorated or missing weatherstrip with **Classic Industries®** reproduction weatherstrip sets.

Note: Image is for illustration purposes only and does not indicate completeness of sets.

WK219
Weatherstrip Set for
1963 Convertible

Impala Convertible Weatherstrip Sets

Bring your weatherstrip back to original factory condition and improve the overall look of the vehicle while maintaining originality with Classic Industries® replacement sets. After many years of use your original weatherstrip can deteriorate or simply rip in the most crucial areas. When this happens, small leaks will begin to enter the interior compartment or trunk area causing rust and the need for expensive sheet metal replacement. Although each item in this set can be purchased separately, we recommend replacing all of the weatherstrip on the vehicle at one time. If you are painting the car or simply replacing worn out parts, the weatherstrip is one of the first places to check.

Each weatherstrip product is manufactured to exact factory specifications and will fit properly and function exactly as designed. A complete set will replace every major weatherstrip component for your Impala model depending on the applications below. Each set includes quarter window vertical side weatherstrip. These are the upgraded versions for an easier installation and quality appearance. The sets are available with correct fitting reproduction window glass weatherstrip. Replace the entire weatherstripping on your early model Impala with Classic Industries® quality reproduction weatherstrip kits. The set includes all of the basic weatherstrip required to help keep the problem areas

from leaking and causing damage or rust to the interior or sheet metal. See the listing below for availability. Please be sure to check your vehicle carefully before ordering. Our sales department can help with any questions you may have concerning the correct set for your year and model. They can also answer questions regarding installation or other products.

Important: Image is for illustration purposes only and does not indicate completeness of sets. Vent Window Weatherstrip and Quarter Window U-Shape Rubber Seals are shown for illustration purposes only and are available separately.

Note: Discount exempt.

Weatherstrip

Replace defective windshield weatherstrip with Classic Industries® quality reproductions.

Windshield Glass Weatherstrip

Superb reproduction of the original weatherstripping which surrounds the windshield glass channel. After years of exposure to the sun and weather, this weatherstrip usually needs to be replaced. Choose from the hardtop, convertible or sedan models.

Reproduction Door Glass Weatherstrip

Reproduction of the original weatherstrip which inserts horizontally on the inner and outer section of the side door windows front and rear. These sets include a flat outer chrome bead unlike the more original round chrome bead style. Although they are not exactly as original, they're a great replacement because they fit great and are much less expensive than the OEM style weatherstrips. We recommend this style to restorers who want functionality and are not looking for complete originality.

Universal Molding Release Tool

The ultimate tool for cleanly releasing moldings. Slide tool left or right under the molding until it hooks a retaining clip, then just rock the tool with a twist of the wrist to release the clip. Heat treated, high-carbon steel.

S21500 8.99 ea

Body Moldings

1962-64 SS Side Molding Inserts

To add the finishing touch you'll need to make your body side moldings shine to the original lustrous finish. Replace them with these beautifully reproduced side molding inserts. Each insert is "engine turned" to produce an effective original appearance utilizing the same process of manufacturing as the original. Heat the original molding and peel the inserts out from the center. Clean the glue and dirt off original molding and apply the new inserts with trim adhesive glue.

Note: * Shipped oversize.

T2302

T2300M (7 piece)

Soft

Medium

Heavy

Soft Prying and Scraping Tools

Available in 3 different fiberglass reinforced plastics, the soft duty tools are good for jobs where a minimum amount of force is needed to remove objects. The medium duty tools are better for the objects that require a little more force to remove, and the heavy duty tools are for the objects that are real stubborn and just do not want to be separated from their current position. All these tools are strong enough to pry yet soft enough not to damage. With 7 tips to choose from: 3 pry bars, 2 wedge tools, a wedge puller and a sticker/gasket scraper, they can do various interior and exterior automotive jobs without the damage that metal tools can do. No chipping paint or tearing fabric. No toolbox should be without these great tools.
