# BESTÅ keeps getting better

The things you loved about BESTÅ haven't changed, like the many storage possibilities across your home and the flexibility to create your own solution by doing your own thing, or adapting one of our pre-designed combinations. Plus, we still offer the same helpful services, like picking and home delivery, at a reasonable cost.

So what's new? Well, we've added a ventilation strip to BESTÅ TV unit, which promotes air circulation and helps manage cables, and front covers in striking new colors. We're pretty pleased with the result, and we think you will be, too.

The storage you keep in the entryway doesn't have to clash with the storage you keep in the living room. Pack in all you need by combining different BESTÅ units in various sizes. The divided storage gives you even more options for all that stuff that tends to pile up at the front door.

When your dining table is also your desk, you need a smart way to keep everything organized. With BESTÅ your tableware and paperwork can live side by side in perfect harmony.

INREDA clothes rail means BESTÅ can cover all your basic storage needs.

The ventilation strip at the back of BESTÅ TV bench flips up so you can keep your often-used cables accessible, while hooks keep them from falling out of reach when not in use.

# Quality and testing

At IKEA test lab we do loads of tests to make sure our products stand up to the wear and tear of everyday life.

You can take a load off your mind knowing that FRAMSTÅ TV bracket is built to hold 37 to 60 inch flat screen TVs weighing up to 132 pounds. Depending on its size, BESTÅ TV unit can withstand a load of up to 176 pounds and comes with a ventilation strip which promotes proper ventilation of electronics.

We test BESTÅ hinges and drawers to withstand opening/closing at least 20,000 times, so you never have to worry about them holding up to everyday wear and tear.

BESTÅ shelf units come with adjustable feet, which means they'll always stand steady even if your floor is uneven. Secure units higher than 25 inches to a wall to keep them steady and prevent tipping. Necessary fasteners included.

# You can do it all yourself. But you don't have to.
